

Instructor: Ray Brown **PHONE:** 339-6684 (518-2188 cell) **OFFICE:** Horizon Hall Rm 114
Office Hours: See Calendar/Schedule posted on www.raytoteach.com
Tutoring: Math Drop-in – College Center Library: M & W 10:30 AM – Noon
Web Site: www.raytoteach.com
E-MAIL: ray.brown@aims.edu; rbrown5637@msn.com

The best method of communication is via email. I generally check my email twice a day and strive to respond within 24hrs.

Optional Textbook: Developmental Mathematics with Applications and Visualization: Prealgebra, Beginning Algebra, and Intermediate Algebra, by Rockswold and Krieger, Pearson Prentice-Hall

- **Online/Hybrid Format:** See the web site www.raytoteach.com and the company web site www.mymathlab.com for more information. **Students are required to complete test on campus.**
- **Students are required to purchase a MyMathLab license.** This may be purchased online or as a kit from the Aims Bookstore. Homework assignments are completed online and submitted via MyMathLab.
- **DO NOT PURCHASE A MyMathLab LICENSE UNLESS YOU ARE SURE YOU NEED A LICENSE.** There is a limited opportunity for returns.
- **The purchase of a hardcopy textbook is optional.**
- A scientific calculator is recommended for some portions of the course, Calculator: **TI-30X II S or equivalent**

Course Description/Prerequisites/Credits: 4 semester credits

- Develops skills necessary for manipulating algebraic expressions and solving algebraic equations. Topics in the course include radicals, complex numbers, polynomials, factoring, rational expressions, quadratic equations, absolute value equations and inequalities, systems of linear equations, related applications, and math learning strategies.
- Prerequisite: MAT 050 (Grade C or better) or Accuplacer scores EA 60-84.

Course Objectives: Upon completion of this course the student/learner should be able to:

- Demonstrate knowledge of and the ability to perform algebraic manipulations with radicals, complex numbers, polynomials, and rational expressions.
- Demonstrate knowledge of and the ability to solve quadratic equations, absolute value equations and inequalities, and systems of linear equations.
- Demonstrate the use of critical thinking skills to solve application problems.

Important Dates:

- Add a course **deadline:** Wednesday, 3 Jun 15
- Drop **deadline** date without anything appearing on transcript: Tuesday, 9 Jun 15
- Midterm week, progress grades submitted to the registrar: on or about 1 Jul 15
- Final date for student to withdraw with a "W": Tuesday, 21 Jul 15
- Comprehensive Final Exam: Wednesday, 5 Aug 15 Testing Office COB

GRADING SCALE:

93 - 100%	A	This scale is used for tests and assignments
84 - 92%	B	
78 - 83%	C	
70 - 77%	D	
0 - 69%	F	

Grading: Tests...70% Assignments...10% Quizzes...5% Comprehensive Final...15%

ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES: Any student who feels s/he may need an accommodation based on the impact of a disability should contact Disability Access Services (DAS) privately to discuss her/his specific needs. Please be aware that before accommodations can be allowed in class they must be approved through the DAS Office. Students should call 970-339-6251 to set up an appointment or email disabilities@aims.edu with any questions. DAS is located in the College Center. We are located in the College Center in the One-Stop Shop area on the 1st floor.

Withdraw "W" Grade: WITHDRAW indicates the student withdraws from the course generating a "W" on the transcript. Withdrawals may be done online or forms may be picked up and processed at the main office.

Incomplete "I" Grade: The Incomplete "I" is an option for the instructor when a student has, for good reason, been delayed in completing the required work and has satisfactorily completed (grade average of "C" or better) at least 75% of the course.

Note: The Incomplete "I" grade is not an option for students on financial aid without consequences. In other words, it is going to affect your financial aid eligibility.

ATTENDANCE: This is an online/hybrid course, therefore, attendance is a bit more "ambiguous" in that we don't meet at a given time in a given room to discuss problems and learn mathematics. However, attendance is required. You will have to log in, preferable daily, to work on mathematics. Attendance is taken in the form of turning in homework and taking tests online. If there is a lapse in this type of participation for a consecutive length of one (1) week, the student is to be reported as a "stop out" per Federal Financial Aid regulations and Aims policies. If you have to be gone for this length of time, but want to continue in the course, please contact your instructor before the length of time expires.

Sample Tests: Can be taken an unlimited number of times to help you understand how to navigate through the test as well as understanding some of the content that is presented in the chapter. These are graded by the computer. Sample Tests have **no impact on your grade**. These can be completed from home and do not require a password.

Pre- Chapter Tests: Taken before starting the chapter homework the pre-tests can reduce the number of homework problems by deleting problems that you mastered on the pre-test. They are taken from home or on a public computer and no password is required but there is a 60-minute time limit. Taking the pre-test can only help you, there is no score recorded.

Chapter Quizzes: Are completed on the MyMathLab website either from home or a public computer. You need to score 70% or better on the chapter quiz to release remaining Chapter Assignments. You have two attempts on the quizzes. Quizzes have a 60 minute time limit. Contact your instructor if you do not successfully complete the quiz in the first two attempts.

Homework Assignments: In MyMathLab there is an assignment for each section that will allow you to practice and learn the concepts. This set of problems is graded by the computer and will offer you guidance in solving the problem set. It is recommended that you maintain a schedule similar to that of a face-to-face class in completing the assignments. **DO NOT try and complete the course in the last week.** 60% or better is needed on each homework assignment in the chapter to make the post-test available to you. If you wish to take the chapter test without scoring 60% or better on each assignment, contact your instructor.

Post Chapter Test: Taken after completing all the homework assignments with 60% or better. Only one attempt is allowed on the Post Test. These are taken in the testing office, **College Center room 230 or on an Aims satellite campus** and require a password to access. Supplemental paper questions are included with the computer test. Be sure to ask for these questions. **CHEATING WILL NOT BE TOLERATED.**

Comprehensive Final Exam: - No Later Than, Wednesday, 6 May 15. The final exam will be comprehensive and represents 15 % of the course grade. All students are required to take the final exam. Students may have **ONE** sheet of paper (8 ½ by 11 inches) with notes, formula, etc. on both sides to use while taking the Comprehensive Final Exam. The student's sheet of notes must be submitted and attached to the final exam. The final is taken in the testing office, College Center room 230 or on a satellite campus. Your score on the final exam can be used to replace the **lowest non-zero** test score.

Course Assistance – While this is an online/hybrid there are resources available to help you be successful in the class. More detail on these can be found on the web site www.raytoteach.com.

TUTORING – Available in the Learning Resource Center (LRC) located upstairs in the College Center and on satellite campuses. See www.raytoteach.com for a link to the web site for hours. Online tutoring is available on request using various synchronous platforms.

INSTRUCTOR – While there are no regularly scheduled classes you can contact your instructor for assistance. See the web site, www.raytoteach.com for instructor office hours. You can also the Ask Instructor button when available in MyMathLab.

Virtual Classroom and Google Hangouts – Information on these tools are posted on the web site, www.raytoteach.com and allow students to work directly with their instructor in real time. These sessions needed to be scheduled with the instructor or accessed at a predetermined time.

“The standard syllabus policies located at <http://www.aims.edu/inside/policies/standard-syllabus/> apply to every course at Aims Community College. These policies are hereby incorporated into this Syllabus.”

STUDENT CONDUCT: Students are expected to practice academic honesty. Each student is responsible for contributing to a positive learning environment. Students who conduct themselves contrary to the best interest of the class as a whole may be dropped from the roster. Students should refrain from expressing derogatory opinions concerning race, gender, ethnicity, and should avoid using obscene language. They must refrain from any form of cheating, plagiarism, or knowingly furnishing false information to the college.

Tutoring: Available for free to Aims and UNC students attending Aims CC. Drop in tutoring is available in Learning Center located in the Library or on an Aims satellite campus. One to one tutoring is available through the tutoring office. Hours and updates are available at, <http://www.aims.edu/student/learning-commons/tsi/> or by calling 339-6541. Online tutoring is available via various **synchronous** platforms and can be requested through the tutoring office.

Counseling: Aims Community College and North Range Behavioral Health are partnering together to offer Personal Counseling Services for current students in the Student Success Center on the Greeley Campus in the One-Stop area of the College Center.
