Chapter 18 Quadratic Functions and Equations
18.3 Quadratic Equations

Basics of Quadratic Equations ~ The Square Root Property ~ Completing the Square ~ Solving an Equation for a Variable ~ Applications of Quadratic Equations

## STUDY PLAN

Read: Read Section 18.3 on pages 1180-1189 in your textbook or eText.
Practice: Do your assigned exercises in your $\quad \square$ Book $\quad \square$ MyMathLab $\square$ Worksheets
Review: Keep your corrected assignments in an organized notebook and use them to review for the test.

## Key Terms <br> Exercises 1-2: Use the vocabulary terms listed below to complete each statement. Note that some terms or expressions may not be used.

quadratic equation
square root property

1. $\mathrm{A}(\mathrm{n})$ $\qquad$ can be written as $a x^{2}+b x+c=0$, where $a, b$, and $c$ are constants with $a \neq 0$.
2. The $\qquad$ states that if $k$ is a nonnegative number, then the solutions to the equation $x^{2}=k$ are given by $x= \pm \sqrt{k}$.

## Basics of Quadratic Equations

Exercises 1-3: Refer to Example 1 on pages 1181-1183 in your text and the Section 18.3 lecture video.

Solve each quadratic equation. Support your results numerically and graphically.

1. $2 x^{2}+5=0$
2. $\qquad$
3. $x^{2}+x-6=0$
4. $\qquad$
5. $x^{2}+1=2 x$
6. $\qquad$

## The Square Root Property

Exercises 4-7: Refer to Examples 2-3 on page 1184 in your text and the Section 18.3 lecture video. Solve each equation.
4. $x^{2}=8$
5. $4 x^{2}-25=0$
4. $\qquad$
6. $(x+3)^{2}=16$
6. $\qquad$
7. An object falls from a height of 80 feet. How long does it take
7. $\qquad$ for the object to hit the ground? $h(t)=80-16 t^{2}$

## Completing the Square

Exercises 8-10: Refer to Examples 4-6 on pages 1185-1186 in your text and the Section 18.3 lecture video.
8. Find the term that should be added to $x^{2}+8 x$ to form a perfect
8. square trinomial.
9. Solve the equation $x^{2}+4 x-3=0$.
9. $\qquad$
10. Solve the equation $2 x^{2}-5 x=4$.
10. $\qquad$

## Solving an Equation for a Variable

Exercises 11-12: Refer to Example 7 on page 1187 in your text and the Section 18.3 lecture video.
Solve each equation for the specified variable.
11. $x=9 y^{2}+1$, for $y$
11. $\qquad$
12. $V=\pi r^{2} h$, for $r$
12.
(Hint: $r>0$.)

## Applications of Quadratic Equations

Exercises 13-14: Refer to Examples 8-9 on pages 1187-1188 in your text and the Section 18.3 lecture video.
13. Find a safe speed limit $x$ for a curve with a radius of 200 feet by
13. $\qquad$ using the equation $R=\frac{1}{2} x^{2}$.
14. The function $f(x)=0.0066 x^{2}-23.76 x+21,389$ models the
14. population of the United States in millions from 1800 through 2000, where $x=1800$ corresponds to the year 1800, etc. Determine the approximate population of the United States in the year 1950 .

15 A hotel is considering giving the following group discount on room rates. The regular price for a room is $\$ 112$, but for each room rented the price decreases by $\$ 4$. A graph of the revenue received from renting $x$ rooms is shown.
Hotel Revenue

(a) Interpret the graph.
(From the graph)
(b) What is the maximum revenue? How many rooms should be rented to receive the maximum revenue?
(c) Use $f(x)$ to calculate when Revenue will be $\$ 0$.
(d) Use $f(x)$ to determine symbolically the maximum revenue
10.(a)
(b) $\qquad$
(c) $\qquad$
(d) $\qquad$ and the number of rooms that should be rented.
